2.	<p>The subject matter of claim 1 is novel and inventive.</p> <p>Document D1 is considered to be the prior art closest to the subject matter of claim 1. Said document discloses (the references in parentheses are to document D1):</p> <p>a method for operating a device for the hydroforming of a blank (5) using a high-pressure fluid, with a tool (1, 2) comprising a space for accommodating the blank (5).</p> <p>Thus, the subject matter of claim 1 differs from the known method in that, before a blank is formed, residual fluid in the tool-accommodating space is carried away via the channel that leads from said space, and in that lubricant is then</p> <p style="text-align: right;">/...</p>		

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

supplied to the tool-accommodating space and high-pressure fluid is applied to the interior of the blank.

The subject matter of claim 1 is therefore **novel** (PCT Article 33(2)).

The problem addressed by the present invention can consequently be regarded as that of preventing subsequently impaired operation: residual fluid accumulates in the fluid and then impairs the forming process.

The solution to the above problem, as proposed in claim 1 of the present application, is not known from the prior art nor is it rendered obvious thereby. The subject matter of claim 1 therefore involves an inventive step (PCT Article 33(3)).

Claim 2 is dependent on claim 1 and, in consequence, likewise satisfies the requirements of the PCT in respect of novelty and **inventive step**.

3. **The subject matter of claim 3 is novel and inventive.**

For the same reasons as those applying in respect of claim 1, the subject matter of claim 3 is novel and inventive.
